SKILLS

Backend

Django, Django REST Framework, Express.js, PostgreSQL, MongoDB, Redis, Firebase

Tools

Git, GitHub, VS Code, Docker, Cloudflare R2

Frontend

React.js, Tailwind CSS, DaisyUI, HTML, CSS

Languages

Python, JavaScript, C, C++

PROJECTS

SiteMan, SaaS Application

Live · GitHub

Mobile-first SaaS application for construction companies. Contractors can manage their projects, workers, worker attendance and expenses with role-based access and a complete audit log.

- Built both the Django REST Framework API and the React client: company/site tenancy, JWT cookie auth, and roles for company admin, site manager, and site auditor.
- Implemented daily attendance, site cash ledgers, work sessions that seal payables, date-range balance reports, and an auditor-reviewed activity log.
- Designed a mobile-first React UI and deployed the API, client, and file storage independently (Railway, Netlify, Cloudflare R2).

Technologies: Django, DRF, React, PostgreSQL, Redis, Cloudflare R2, JWT, Railway, Netlify

Dcom, E-commerce Application

Live · GitHub

Multi-role e-commerce with customer shopping, manager inventory and order control, and rider delivery — including guest cart merge, order tracking, and Google auth.

- Designed Django models for catalog, cart, orders, and riders with snapshot order items, guest-to-account cart merge, and an append-only order-event audit trail.
- Implemented atomic inventory updates, rider assignment by zone, area, city, and country, django-allauth email and Google login, Redis catalog cache, and Cloudinary media in production.

Technologies: Django, PostgreSQL, Tailwind CSS, DaisyUI, django-allauth, Redis, Cloudinary

ProFast, Parcel Delivery Application

Live · GitHub

Multi-role parcel delivery platform for Bangladesh with send, track, and pay flows, rider collection and earnings, and admin operations.

- Built role-based dashboards for users, riders, and admins with Firebase Authentication and Express/MongoDB APIs verified by Firebase Admin.
- Implemented parcel send/track/pay with warehouse hops, Stripe payments, a nationwide coverage map, and rider earnings from collect and deliver work.

Technologies: React, Express, MongoDB, Firebase, Stripe, Tailwind CSS

EDUCATION

Higher Secondary Certificate (Science), Mirpur Science College

2022 – 2024 | Dhaka, Bangladesh

ADDITIONAL

Solved 200+ coding problems on Codeforces, LeetCode, and HackerRank.
